

Plane Onboarding Automation — Flow

Signed proposal → Won → auto-created delivery project · 2026-05-27

When a client signs the proposal in **Documenso**, the deal is moved to **Won** in the CRM and a **Plane delivery project** is created automatically — seeded with the standard 7-step engagement checklist — and the link is posted to `#client-success`. All orchestration lives in the `pandoc-render` sidecar's `/onboard` endpoint; `n8n` is just the thin webhook trigger.

Built 2026-05-27. Source of this flow: `pandoc-render/server.js (/onboard, createPlaneProject)` + `n8n/workflows/08-onboarding-kickoff.json`. Plane config in `gitignored .env (PLANE_API_TOKEN, PLANE_WORKSPACE_SLUG=underwings)`.
